

Simón Monsalve

Software engineer

About me

Graduated from Dr. Rafael Belloso Chacín University (URBE), with over four years of experience developing a wide variety of projects in both front-end and back-end, for web, mobile, and desktop. While primarily focused on web development, I'm always eager to learn new tools, languages, and skills. I am capable of handling responsibilities and making sound decisions. I possess good communication and customer service skills. I am seeking professional development opportunities.

Education

Computer Engineering | Sep. 2018 – Aug. 2023
Universidad Dr. Rafael Belloso Chacín (URBE), Maracaibo, Venezuela.

High School | Aug. 2013 – Aug. 2018
U.E Nuestra Sra. de Guadalupe, Maracaibo, Venezuela.

Primary School | Mar. 2005 – Jun. 2013
U.E.P Gladys Delgado, Maracaibo, Venezuela.

Work Experience

Full-stack web developer | April 2023 – June 2024
Dohmi Culinary Institute, Maracaibo, Venezuela.
<https://www.dohmi.com>

- Development, design and maintenance of the website using Thinkific as a LMS.
- Supervision and data management through the platform.
- Development of a web platform to manage a scholarship system database using MongoDB.
- Analysis and structure of migratory data.
- Installation, supervision, maintenance and troubleshooting of software such as Microsoft 365, Adobe, audio systems, and others.
- Use of AI tools to optimize several processes such as automations, content generation, chatbots, among others.
- Active campaign implementation to automate workflows processes like email marketing, CRM control, and other.

Software Developer | February 2024 – June 2024
SmartWorld, Maracaibo, Venezuela.

- Development of apps through Github repositories, implementing NodeJS, React, Tailwind, etc. as programming languages.
- Management of the company's social media: application and use of GoHighLevel to design and manage automations, manage the content grid, configure chatbots.
- Installation and Management of Linux operating systems, as well as the use and knowledge of the terminal and packages.
- Handling of VR and AR systems.
- Software solutions.

Web Developer | May 2023 – January 2024
Emprendetec, Valencia, España.
<https://www.emprendetec.es/>

- Development, design and maintenance of the company's website.
- Use and implementation of several AI tools such as Poe, Chatgpt, Gemini, Gamma, Grammarly, Synthesia, and others.
- APIs Integration and web services to improve the user experience.
- Analysis and monitoring of data and user behavior metrics to improve the online experience.
- Training and support to users in the use of the developed applications and websites.

Web Developer | May 2023 – January 2024
Instituto Universitario Tecnológico Dr. Cristóbal Mendoza (IUTCM), Mérida, Venezuela
<https://www.iutcm.online/>

- Development, design and maintenance of the company's website.
- Use and implementation of several AI tools to improve several processes such as automations, content generation and chatbots
- API implementations on web site.
- Supervision of the academic content of the web platform, as well as guidance and advice for tutors in each area.
- Participation in code review and quality control processes.
- Software solutions adjusted to specifications and best practices

Work Experience

Full-Stack Developer | December 2024 – July 2025
Inimble LLC, Georgia, United States.
<https://inimbleapp.com/>

- Developed and maintained an HRIS (Human Resources Information System) using Angular (frontend) and MariaDB (backend), featuring: Time-tracking with clock-in/clock-out functionality and integrated timer. Kanban-style task assignment board. Customizable work-hour reports (individual/team) with export capabilities. Recruitment module for resume management and interview scheduling. Real-time collaboration tools: notes, calendar, and internal chat (team/support).
- Deployed and managed AWS cloud infrastructure: EC2 instances, S3 buckets, and scalable environments.
- Led CI/CD deployments to testing and production environments.
- Designed database migrations for schema evolution and data optimization with MariaDB.
- Conducted code reviews (GitHub) and QA testing for bug prevention and release quality.
- Revamped front-end interfaces to enhance UX and client engagement.
- Integrated Firebase for multi-provider authentication (Google/Microsoft) and data storage.
- Automated workflows using GitHub Actions (testing/deployments/notifications).
- Implemented Stripe as payment gateway for subscriptions/transactions.
- Debugged and optimized platform performance proactively.
- Maintained technical documentation in Azure DevOps (wikis/API guides).
- Developed REST APIs with testing via Postman/Swagger.
- Provided user support/training: onboarding, issue resolution, and process optimization.

Automation Developer | March 2026 – Present
EADIC – Kinedrik, Madrid, Spain.
<https://eadic.com/>

- Spearheaded the development of a comprehensive automation solution using Google Apps Script that transforms tutor form submissions into detailed student technical profiles. Integrated the workflow with the ChatGPT API to optimize content drafting and automatically generate presentations with the company's branding (Google Slides), reducing profile creation time from 3 hours to just 10 minutes (94% reduction).
- Designed and built a full-stack web application with React that empowers students to create their own professional CVs. The app leverages an AI engine (via API) for content generation, features a real-time chat interface for on-the-fly adjustments, and recommends company courses based on the student's profile, increasing personalization and upselling opportunities.
- Implemented and administered Google Cloud Platform (GCP) solutions for the deployment, configuration, and maintenance of applications, including setting up a CI/CD pipeline integrated with GitHub to automate deployments, ensuring stability and continuous delivery.
- Developed a web scraping application to extract and centralize the most relevant job listings for students, integrating them into the company's website to facilitate their job placement process.
- Built an internal web application for team task management and performance metrics tracking, improving team visibility and operational efficiency.
- Automated complex workflows using n8n and Make, connecting multiple services and APIs to optimize internal processes and reduce manual intervention.
